

## Pothos

Latin name: Epipremnum aureum

**Light:** Low light requirements/grows in the shade

**Water:** Low water/high drought tolerance

**Notes:** Leaves of plant tend to spread out. Provides a good medium texture and coverage of hardware.

Jade

Golden

Marble Queen

## Philodendron

Latin name: Philodendron scandens

**Light:** Low-light / best in indirect sunlight

**Water:** Low-water needs/allow roots to slightly dry before rewatering

**Notes:** Leaves grow down and help to fill space. This plant is best for the top of the wall.

Brazil

Cordatum

Red Congo

Heart-leaf

## Ferns

Latin name: varies by type

**Light:** Low light requirements / grows in the shade

**Water:** Low water needs. Keep soil moist

**Notes:** Leaves tend to grow out and provide great coverage of hardware. Ferns are slower to grow but help to add texture to the walls. There are over 9,000 species of ferns.

Rabbit-foot

Bird's nest

## Spider Plant

Latin name: *Chlorophytum comosum*

**Light:** Low light requirements.  
Grows in the shade.

**Water:** Low water needs. Plant has a high drought tolerance.

**Notes:** Leaves can cascade down a wall and will provide coverage of hardware. This plant is best for the top of wall.

## Nephtytis

Latin name: *Syngonium podophyllum*

**Light:** Low light requirements

**Water:** Low water needs

**Notes:** Leaves tend to grow down so this plant is best for the top of the wall. There are many varieties.

## Dracaena

Latin name: varies by type

**Light:** Low light/ normally grows in the shade

**Water:** Water to keep soil moist but never soggy

**Notes:** Leaves of plant tend to grow up. This plant should be placed towards bottom of wall. Provides good ground coverage/ spreads out.

Gold star

Lemon lime

Janet Craig

## Peace Lily

Latin name: *Spathiphyllum*

- Light:** Bright, indirect light needs. More light leads to more flowering; less light leads to a green foliage look.
- Water:** Low water needs. Can tolerate underwatering better than overwatering; keep moist but not let it sit in water
- Notes:** Dark green foliage, pure white flowers. This plant is best for smaller walls.

## Calathea

Latin name: *Calathea makoyana*

- Light:** Filtered light/indoor light is best since bright light can wash out leaf colors. Grows in the shade.
- Water:** Low water needs; keep soil moist but not let it sit in water. Performs humidity/moist air
- Notes:** Leaves are evergreen with white markings that provide ground cover. This plant performs well in containers.

## Prayer Plant

Latin name: *Maranta leuconeura*

- Light:** Low/indirect light and typically grows in the shade. Too much direct light will bleach the leaves.
- Water:** Low water needs. Likes moist soil so will work well with wick system
- Notes:** Leaves tend to grow down/cascade which will help to cover hardware. Suitable for indoor and container planting.

## Chinese evergreen

Latin name: *Aglaonema modestum*

**Light:** Low light needs. Requires shade.

**Water:** Moderate water needs.

**Notes:** Leaves are a simple spiral pattern of green foliage. High light turns leaves yellow.
